

Septimatech Bottle Inverter Systems

Product orientation made EASY

Septimatech Bottle Inverter Systems provide smooth, controlled inversions for containers of many shapes and sizes. Product inversion is made easy, no matter the application required.

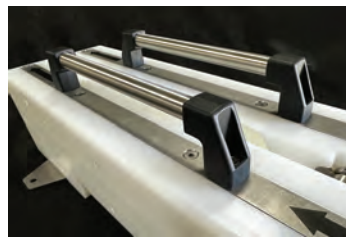

Septimatech's inverter solutions offer end users high value and high performance through low-cost yet efficient and robust engineered components. They utilize standard components and take advantage of cutting-edge manufacturing technology.

Applications include: 90°, 180°, and 360° inversions, 120° & 360° side dump, cap sterilization, air nozzle, dust/debris shakeout, and more.

Customers standardizing on Septimatech Bottle Inverting systems enjoy faster changeovers, less scuffing on containers, more effective throughput, and greater productivity on their packaging lines.

Benefits

- Increases changeover efficiency
- Enhanced washdown / cleaning capabilities
- Lightweight components for improved operator ergonomics
- Tool-less quick change installation options
- Options for many applications in one solution
- No measure up or machine modifications required
- Efficient, smooth container flow through

Easy to install onto any conveyor.

Belt drive for enhanced control.

Modular design for easy washdown.

360° Inversion with dust clean out.

Features

- 2 piece design for lightweight changeovers and enhanced cleaning
- Cap sterilization, air nozzle, dust/debris shakeout and more
- Handles for improved changeover ergonomics
- Utilizes existing line back pressure for operation
- 90°, 180°, 360° inversions
- Optional belt drive to create additional backpressure

Productivity Made EASY
