

Septimatech Multi-Lane Adjust System

Adjust Up to 7 Lanes. No Change Parts, Spacers or Templates Required

Septimatech Multi-Lane Adjust eliminates change parts, spacers, templates and lifting that cause unnecessary downtime, ergonomic risks and expense. Precisely adjust 30 feet of lane guides simultaneously from one location in seconds.

Adjustments are repeatable and accurate to plus or minus 1 mm. Numerical displays on each adjuster provide quick setting confirmation. Color-coded adjusters provide immediate recognition of lanes being adjusted. Operator variables are eliminated.

Multi-Lane Adjust creates up to 7 lanes with a minimum width of 1.5 inches. Multi-Lane Adjust easily creates tailored lane set ups for a variety of current or future products and case configurations. There are no restrictions to package shape, size or weight. It is an ideal solution for any funneling, accumulation, or parallel lane application.

Benefits

- Accurate, repeatable changeovers
- No fine tuning required
- Faster, one person changeovers
- Adjust lane width and the number of lanes
- Eliminates storage of change parts and templates
- Simple adjustment for container variances during production
- Quick return on investment

Numerical displays and color-coding provide confirmation of settings.

Robust components maintain position during back pressure.

Easily create multiple lanes for different applications or products. Rapidly move unused lane dividers to conveyor outer edge when not in use.

Features

- Installs and adapts easily to existing or new equipment
- No lifting equipment—improved safety and ergonomics
- No change parts, templates or spacers required
- Easily create multiple case packer infeed configurations
- Flexibility to easily change to accommodate multiple SKUs and containers.

Productivity Made EASY
