

Proven Performance in Every Packaging Changeover

VII

SEPTIMATECH
GROUP INC.

Change Part Innovation

Customer Challenge

Customer's new larger container was too big for the filler head pitch.

The customer wanted a cost-effective and easy to changeover solution that would allow them to run a variety of containers on the line.

About the Customer

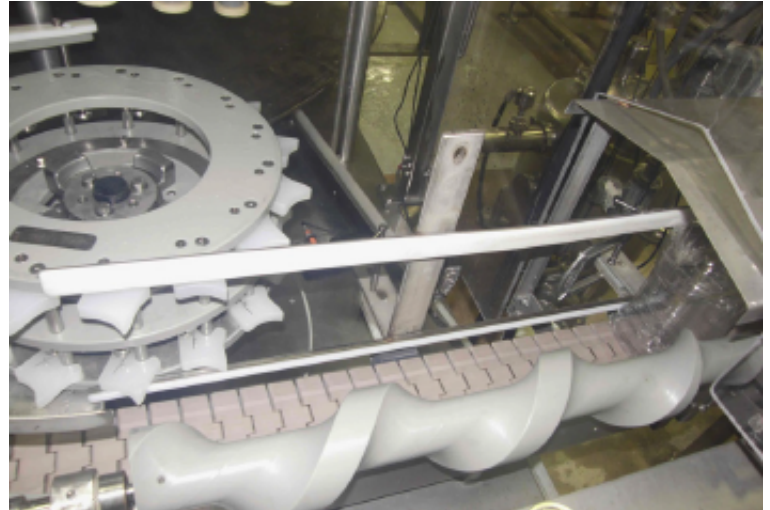

The customer is one of the world's leading producers of food and juice beverages with lines that run multiple products in different containers.

Solution

Septimatech designed and manufactured an innovative, alternating pocket star wheel that modified the existing 15 pocket start to precisely skip feed and handle every other container.

Results

- The customer was able to reliably handle the new container without having to buy a new machine.
- The customer's line had more flexibility to handle a variety of different sized containers.

Reliable Performance in Every Change

Septimatech delivers productivity improvements for packaging lines and machines worldwide by:

- making changeovers more efficient
- simplifying operations
- improving ergonomics
- increasing precision, accuracy and repeatability
- enhancing line and machine flexibility.

Septimatech removes obstacles to optimum performance and replaces them with faster, intuitive solutions and processes. We save our Customers time and money every day with:

- faster changeovers
- repeatable performance
- higher throughput
- reduced labor
- increased uptime
- improved product handling.
