

# Proven Performance in Every Packaging Changeover

# VII

**SEPTIMATECH**  
GROUP INC.

## Unison Gravity Chute

### Customer Challenge

Customer needed to convey multi-sized containers on a line at different elevations including inclines. Containers on inclines would fall forward and jam. Chute adjustments and jam fixes required ladders. Changeover was time consuming and not easily repeatable or accurate.

### About the Customer

The customer is a large multinational consumer goods manufacturer of health, hygiene, and home products.

### Solution

Septimatech installed its Unison adjustable gravity chute and guide rail system across the entire line, including, the inclines, straights, curves, and crossovers.

### Results

- Changeovers reduced from hours to minutes.
- All adjustments possible from ground floor.
- All adjustments repeatable and accurate.
- Repeatable top rail and container height adjustments eliminated bottle tipping
- Health and safety risks eliminated.

### Reliable Performance in Every Change

Septimatech delivers productivity improvements for packaging lines and machines worldwide by:

- making changeovers more efficient
- simplifying operations
- improving ergonomics
- increasing precision, accuracy and repeatability
- enhancing line and machine flexibility.

Septimatech removes obstacles to optimum performance and replaces them with faster, intuitive solutions and processes. We save our Customers time and money every day with:

- faster changeovers
- repeatable performance
- higher throughput
- reduced labor
- increased uptime
- improved product handling.
